

Eclipse Scout

Release Notes

Scout Team

Version 6.1

Table of Contents

What's New	1
Mnemonics	1
Strong content security policy CSP	1

What's New

Mnemonics

Mnemonics are not supported anymore. All affected texts were either edited or removed because they are not used anymore.

Strong content security policy CSP

The stronger CSP disables inline javascript in html. Therefore the 'New Scout Project' wizard now creates a js file per html file and includes it using the script element.
